## PRESS RELEASE

FOR RELEASE: IMMEDIATE

CONTACT: Tony Tulino 1-800-474-2732

DATE: April, 2006

### Introducing Unitrex® *Ultra R-Panel*; the Strongest Corrugated Polycarbonate Panel Available

FEASTERVILLE, PA...Based on strength and performance, *Ultra R-Panel* is the ultimate siding and roofing polycarbonate panel for your facility. *Ultra R-Panel* is designed as an exact match to a metal R-Panel profile. *Ultra R-Panels* take on harsh weather conditions, impacts from warehouse equipment, and corrosive chemicals and liquids, and still makes your building look like new.

*Ultra R-Panel* is a heavy-duty corrugated polycarbonate panel from H&F Manufacturing. The panel is designed specifically for new or retrofit siding or roofing applications for commercial, industrial and residential structures. *Ultra R-Panels* offer strength and stability characteristics superior to any other corrugated, polycarbonate product available on the market today, and the panels are easy to handle and install.

*Ultra R-Panel* is available in Clear and Opal White. Engineered to maintain color stability and high light transmission, the panel lends itself to a wide variety of applications including, but not limited to, skylights, sidelights, siding and roofing. *Ultra R-Panel* has a non-combustible flame spread rating of 6; considerably less than other non-metallic panels.

*Ultra R-Panel* is manufactured and distributed by H & F Manufacturing Corp., a leader in the manufacture of plastic building materials. Since 1973, H & F has brought to the industry, the most advanced PVC, "Phase-2", and Polycarbonate, "Unitrex", Siding, Roofing, and Louver Panels.

® UNITREX is a Registered Trademark of H & F Manufacturing Corp.
