

# Unitrex Polycarbonate Sunsky

The Universal Polycarbonate Panel

## Corrugated Polycarbonate Skylight and Sidelight Panels for Residential, Commercial, and Industrial Buildings

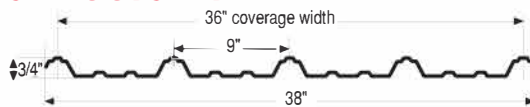

High performance glazing that stands up to punishing exterior applications, Sunsky Corrugated Polycarbonate panels offer multiple advantages over traditional non-metallic corrugated panels: up to 20 times greater impact resistance, the highest light transmission rates, the lowest yellowing index, the highest load rating, and the highest resistance to wind uplift—outstanding properties confirmed in accredited laboratory testing and in installations worldwide since 1984.

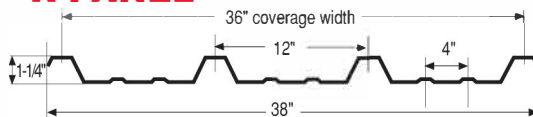

Virtually unbreakable, Sunsky Corrugated Polycarbonate retains its impact properties over a wide temperature range while meeting building code requirements.

Sunsky panels form a complete shield against harmful UV rays while admitting most of the visible light and preventing heat loss at night. Sunsky is designed for use as skylights on corrugated metal roofs, and as ridge lighting and vertical wall glazing. Sunsky matches many metal profiles.

### 9" CLASSIC RIB

### 12" R-PANEL

#### Colors:

Clear .....	90% LT	White Opal.....	45% LT
Soft White.....	85% LT	Solar Control Silver .....	20% LT

### GRECA 76 RIB

#### Colors:

Clear .....	90% LT	Solar Grey .....	35% LT
Smooth Cream.....	85% LT	Misty Green .....	20% LT
Hunter Green.....	Opaque	White Opal .....	45% LT
		Solar Control Silver.....	20% LT
		Red Brick.....	Opaque

Sunsky and Greca are available in other colors, thicknesses and light transmission upon request.

Minimum quantities may apply.

Available Standard Lengths:

Sunsky:	Up to 24'
Greca:	Up to 16'
Greca Plus:	Up to 24'

(Note: Other profiles and lengths are available upon request.)

### Technical Properties:

- Excellent impact resistance
- High light transmission rates
- High load rating
- High resistance to wind uplift
- Extremely high temperature range (-40° to 212°F)

### H & F Sales and Service:

Since H & F Manufacturing Corporation was founded in 1973, we have taken great pride in our sales expertise and customer service. Our qualified technical salespeople will not only help you determine which products are suitable for your project, we will help you determine the exact material specifications and accessories, and coordinate delivery.

### Installation:

You will be amazed at how easy Unitrex Sunsky panels are to install. These lightweight panels are easy to handle and require no special equipment. Unitrex Sunsky panels can be cut in the field using any kind of saw or woodworking tools.

### Unitrex Sunsky...

has a non-combustible flame spread rating of 6, considerably less than acrylic or fiberglass panels—and does not emit toxic or irritating gases. Unitrex Sunsky panels are completely UV resistant, offering a substantial advantage over other materials.

### Cleaning and Maintenance:

Unitrex Sunsky panels are easy to clean and maintain using conventional equipment.
